

A ventilated helmet that satisfies the structural and functional requirements of both ANSI and EN standards. The robust ABS + polycarbonate shell features wide ventilation holes protected by metal mesh covers. The energy absorbing internal shell is made of high-density EPS foam. The webbing suspension system adapts to the shape of the head for a uniform and comfortable fit. The vertical position of the polyamide headband is adjustable both in the front and back. Turn dial adjustment is easy to operate with one hand and ensures a secure and precise fit. Adapter kit for small heads is included. The helmet comes standard with sweat-absorbing padding on the suspension system. Water-repellent foam replacement padding is also included in the packaging. Full strength chin strap (> 50 kg) prevents incidental or accidental release. Equipped with attachment points for ear protection, visor and headlamp. Available in 5 colors and further customizable with 9 versions of colored stickers. Equipped with NFC TRACK tag for digital identification. One size fits all.

Standards:

- EN 12492, that also includes requirements for use at very low temperature (-20°C);
- EN 397 performance requirements for energy absorption and resistance to penetration;
- American standard ANSI Z89.1 Type 1 Class C.

2022 UPDATE: new name (ARES AIR PLUS instead of ARES AIR ANSI).

1 Red

4 Orange

7 White

8 Black

3 Fluo yellow/ Reflective grey

PARTS INCLUDED IN THE PACKAGE

Ares Visor

0749 Clear
074901 Shaded
 Compatible with all Ares series helmets.
 (Supplied separately).

074501
Replacement turn dial
adjustment kit for all Ares series
helmets.

074503
Replacement headlamp holder
clips for all Ares series helmets
(4 pcs).

074504
Caps for visor and ear protection
slots for all Ares series helmets
(2+2 pcs).

074505
Adapter kit for reducing the size
for all Ares series helmets
(except Ares MIPS).

074506
Replacement mesh padding kit
for all Ares series helmets
(except Ares MIPS).

074507
Replacement foam padding kit
for all Ares series helmets
(except Ares MIPS).

074508
Replacement chin strap kit for
Ares Air, Ares Air Plus.

2067
Replacement chin strap padding
(5 pcs).

C.A.M.P. presents in this catalog a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID (High Frequency Radio Frequency Identification)** communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

- G.T.S. - GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app.

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.
