

FOCUS LIGHT XT

FULL BODY HARNESS

NFC - HF RFID | INTERNATIONAL CE+ANSI | PAT. PEND.

Ref. 2663

TOWERS/INDUSTRY, ROOFS, CONSTRUCTION, PLATFORMS

A basic fall arrest harness. With its dual certification (ANSI + EN), the Focus Light XT satisfies the strict regulatory needs of workers at height in many parts of the world.

ANSI STS automatic buckles on the legs loops and sternal make this harness extremely quick and easy to put on and take off. Certified break-away parking loops for lanyards on the shoulders.

2 steel attachment points for fall arrest: 1 dorsal with certified load indicator and 1 sternal (no load indicator). Two gear loops. Equipped with NFC TRACK tag for digital identification.

One size fits all.

2022 UPDATE: new name (FOCUS LIGHT XT instead of FOCUS LIGHT ANSI).

Ref.	Product name	Size	Weight		Chest 	Legs 	Height 	CE	ANSI	EAC	Attachment points 
			g	oz	A (cm)	C (cm)	D (cm)				
2663	FOCUS LIGHT XT	One size	1650	58.2	80-140	45-75	50-90	•	•	•	

- 1 NSI STS automatic buckles on the legs loops and sternal make the Focus Light ANSI extremely quick and easy to put on and take off.

- 9 CE label with serial number and batch number.
- 10 Fast adjustment steel buckles.
- 11 Side crossing plate for improved size adjustment.
- 12 Equipped with NFC TRACK tag for digital identification.

LANYARD PARKING

FALL INDICATOR

C.A.M.P. presents in this catalog a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID** (High Frequency Radio Frequency Identification) communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

- G.T.S. - GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app.

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S.** includes the **technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.
