

Lightweight and compact portable emergency hoist for rescues at height. A pre-rigged 6-to-1 allows an injured person to be unweighted from their fall position and lifted for connection to the rescuer for descent to the ground. Reduction ratio: 6; Maximum recovery height: 1 m; Working load limit: 120 kg; Breaking load: 7 kN.

WARNING: This is not PPE and must not be relied on as the victim's only point of attachment. It must always be used in combination with complete fall arrest systems.
